

Efficiency vs pixel layer

Plot of efficiency vs pixel layers. The y-axis is 'efficiency vs pixel layers' (0.005 to 0.05) and the x-axis is 'TP pixel layers' (0 to 8). Data points are shown for three methods: DQM_original_step2_ttbar-phase1-newgeom (blue), DQM_mkFit_step2_ttbar-phase1-newgeom (red), and DQM_pixelCPETemplate_step2_ttbar-phase1-newgeom (black). A horizontal line is at 1.0. A shaded gray region is at the bottom.

fake+duplicates vs pixel layers

Plot of fake+duplicates rate vs pixel layers. The y-axis is 'fake+duplicates rate vs pixel layers' (0.95 to 0.8) and the x-axis is 'track pixel layers' (0 to 8). Data points are shown for three methods: DQM_original_step2_ttbar-phase1-newgeom (blue), DQM_mkFit_step2_ttbar-phase1-newgeom (red), and DQM_pixelCPETemplate_step2_ttbar-phase1-newgeom (black). A horizontal line is at 1.0. A shaded gray region is at the bottom.

Efficiency vs 3D layer

Plot of efficiency vs 3D layers. The y-axis is 'efficiency vs 3D layers' (0.005 to 0.05) and the x-axis is 'TP 3D layers' (0 to 20). Data points are shown for three methods: DQM_original_step2_ttbar-phase1-newgeom (blue), DQM_mkFit_step2_ttbar-phase1-newgeom (red), and DQM_pixelCPETemplate_step2_ttbar-phase1-newgeom (black). A horizontal line is at 1.0. A shaded gray region is at the bottom.

fake+duplicates vs 3D layers

Plot of fake+duplicates rate vs 3D layers. The y-axis is 'fake+duplicates rate vs 3D layers' (0.9 to 0.8) and the x-axis is 'track 3D layers' (0 to 20). Data points are shown for three methods: DQM_original_step2_ttbar-phase1-newgeom (blue), DQM_mkFit_step2_ttbar-phase1-newgeom (red), and DQM_pixelCPETemplate_step2_ttbar-phase1-newgeom (black). A horizontal line is at 1.0. A shaded gray region is at the bottom.
