

Fake rate vs dxy

Duplicates Rate vs Dxy

Pileup rate vs dxy

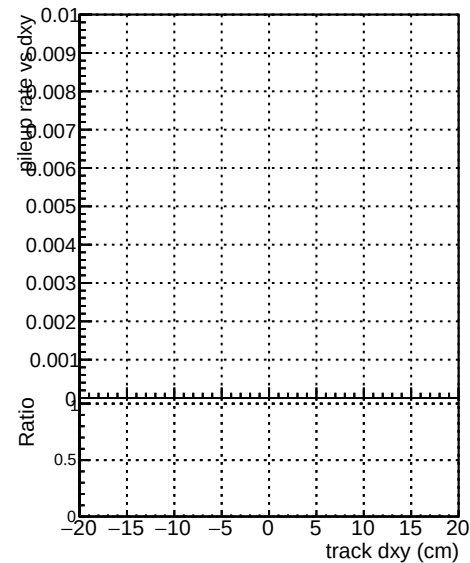

Figure 10: Fake rate vs d. The chart shows the fake rate for different models and steps. The y-axis represents the fake rate, and the x-axis lists the models: DOM, original, step2, pt1to20, eta2to5to4p0, and their combinations. The fake rate is generally high (around 0.8) for the first few models and decreases for the combinations.
