

### Efficiency vs hit

fake+duplicates vs hits

Efficiency

Figure 1 consists of two vertically stacked plots sharing a common x-axis labeled 'track layers' ranging from 0 to 5. The top plot's y-axis is 'fake+duplicates rate vs layers' ranging from 0 to 0.8. It shows a black line at 0 for layers 0-3, a jump to ~0.35 at layer 4, and a magenta line with error bars peaking at ~0.5 at layer 4. The bottom plot's y-axis is 'Ratio' ranging from 0 to 1. It shows a black line at 0 for layers 0-3, a jump to ~0.65 at layer 4, and a grey shaded region with error bars peaking at ~0.5 at layer 4.
