

Efficiency vs hit

fake+duplicates vs hits

Efficiencia

Figure 1 consists of two vertically stacked plots sharing a common x-axis labeled 'track layers' ranging from 0 to 25.

The top plot shows the 'fake+duplicates rate vs layers'. The y-axis ranges from 0.0 to 0.8. Data points are represented by colored crosses (red, green, blue, orange) with vertical error bars. The rate starts at approximately 0.65 at layer 3, drops to 0.3 at layer 4, then to 0.58 at layer 6, 0.49 at layer 7, 0.39 at layer 8, 0.25 at layer 9, 0.15 at layer 11, 0.12 at layer 12, 0.1 at layer 13, 0.08 at layer 14, 0.07 at layer 15, and 0.05 at layer 16.

The bottom plot shows the 'Ratio' (y-axis, 0.9 to 1.0) versus 'track layers' (x-axis, 0 to 25). Data points are represented by black crosses with vertical error bars. The ratio is mostly around 1.0, with some fluctuations and vertical error bars. A horizontal line is drawn at Ratio = 1.0.
