

Efficiency vs pixel layer

Plot of efficiency vs pixel layer. The y-axis is labeled 'efficiency vs pixel layers' and 'Ratio' on a log scale from 0.95 to 0.05. The x-axis is 'TP pixel layers' from 0 to 8. Data points with error bars are shown for the same five methods. A horizontal line is at Ratio = 1.0. A grey shaded region is at the bottom.

fake+duplicates rate vs pixel layers

Plot of fake+duplicates rate vs pixel layers. The y-axis is labeled 'fake+duplicates rate vs pixel layers' and 'Ratio' on a log scale from 0.95 to 1. The x-axis is 'track pixel layers' from 0 to 8. Data points with error bars are shown for the same five methods. A horizontal line is at Ratio = 1.0. A grey shaded region is at the bottom.

Efficiency vs 3D layer

Plot of efficiency vs 3D layer. The y-axis is labeled 'efficiency vs 3D layers' and 'Ratio' on a log scale from 0.9 to 0.05. The x-axis is 'TP 3D layers' from 0 to 20. Data points with error bars are shown for the same five methods. A horizontal line is at Ratio = 1.0. A grey shaded region is at the bottom.

fake+duplicates rate vs 3D layers

Plot of fake+duplicates rate vs 3D layers. The y-axis is labeled 'fake+duplicates rate vs 3D layers' and 'Ratio' on a log scale from 0.9 to 0.8. The x-axis is 'track 3D layers' from 0 to 20. Data points with error bars are shown for the same five methods. A horizontal line is at Ratio = 1.0. A grey shaded region is at the bottom.
