

Number of tracks vs collection

Number of true tracks vs collection

Number —●— DQM_mkFit_QCDHighPt_base

Number

Figure 1 is a scatter plot showing the ratio of duplicate tracks to total tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.95 to 100 on a logarithmic scale. The x-axis lists the methods: generalTracks, biasStep, lowPct, highPct, lowPctQuadStep, highPctQuadStep, pixel, pixelQuadStep, pixelNetStep, pixelNetConStep, pixelNetRegionStep, pixelNetSeedStep, pixelNetSeedRegionStep, pixelNetSeedRegionStep. The plot shows that pixelNet methods have a ratio near 1, while other methods have ratios significantly higher, up to 100. Error bars are shown for each method.

Number of pileup tracks vs collection
