

Number of tracks vs collection

Number of true tracks vs collection

Number —●— DQM_CKF_TT_retrainOldFiles125_v2_prelimWPM_epoch0

Figure 1 is a log-log plot showing the ratio of duplicate tracks between different methods. The y-axis is labeled 'Ratio' and ranges from 0.9 to 10^5 . The x-axis lists 15 methods: generalTracks, initialStep, initialStepQuasiStep, initialStepTripleStep, initialStepQuasiStep, detachedTripleStep, initialPairStep, initialTripleStep, initialTripleStep, initialTripleStep, initialTripleStep, initialTripleStep, initialTripleStep, initialTripleStep, initialTripleStep. The plot shows that the ratio of duplicate tracks is generally high (above 10^2) for most methods, except for the initialStep methods which are close to 1.0. The initialStep methods are shaded gray.

Number of pileup tracks vs collection
