

N of reco track vs normalized χ^2

N of associated (recoToSim) tracks vs normalized χ^2

N of associated (recoToSim) loop tracks vs normalized χ^2

N of reco track vs. χ^2 for BSM, mkt, and OCB methods. The legend indicates the methods used: BSM (black), mkt (red), and OCB (blue). The x-axis is track χ^2 (0 to 20) and the y-axis is the number of tracks (0.1 to 100). The bottom panel shows the ratio of tracks (0.8 to 1.2) versus track χ^2 (0 to 20).
