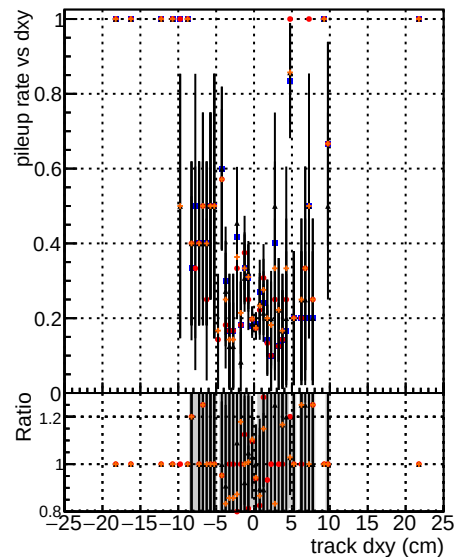

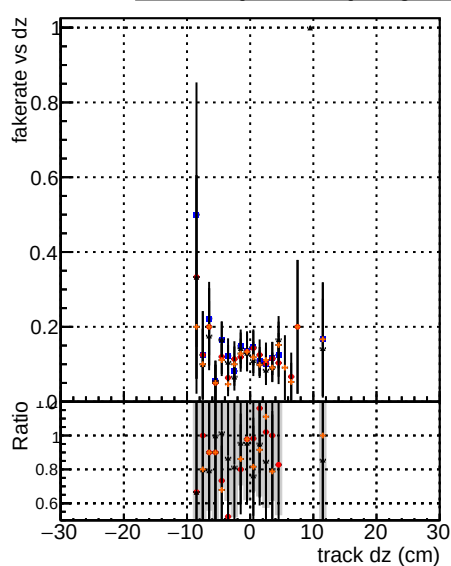

Figure 10: Fake rate vs d. The chart displays the fake rate for various models and datasets. The y-axis represents the fake rate, and the x-axis lists the models: DGM mkFit5, DGM mkFit6, and DGM mkFit7. The legend indicates 'High Pt base' (blue) and 'High Pt base' (orange). The chart shows that the fake rate is generally low for all models and datasets, with some variation across different datasets and models.
