

N of reco track vs normalized χ^2

N of associated (recoToSim) tracks vs normalized χ^2

N of associated (recoToSim) loop tracks vs normalized χ^2

N of reco track vs. χ^2 for BOM, mkt, fit, and other tracks. Legend: BOM (blue), mkt (red), fit (green), other (black). Data points are shown for different track types and normalized χ^2 values. The plot shows the distribution of tracks across the χ^2 range, with a peak around $\chi^2 = 4$.
