

N of reco track vs normalized χ^2

N of associated (recoToSim) tracks vs normalized χ^2

Figure 1 is a log-linear plot showing the ratio of fake tracks to total tracks as a function of track χ^2 . The y-axis is labeled 'fake tracks' and ranges from 10^0 to 10^2 . The x-axis is labeled 'track χ^2 ' and ranges from 0 to 20. The plot shows data points with error bars for various track types, represented by different colors and symbols. A horizontal line at Ratio = 1.0 is shown, with a shaded region below it.

N of associated (recoToSim) looper tracks vs normalized χ^2

N of reco track vs. s
