Figure 10 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.95 to 10^4 on a logarithmic scale. The x-axis lists 15 methods: generalTracks, TripleStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep, TripleStepLessStep. Each method is represented by a grey bar indicating the ratio and a black cross with error bars indicating the standard deviation. The 'generalTracks' method has a ratio near 10^4 . 'TripleStep' and 'TripleStepLessStep' have ratios around 10^2 . Most other methods have ratios between 1 and 10.

Number of pileup tracks vs collection
