

Figure 1 consists of two vertically stacked plots sharing a common x-axis labeled 'TP 3D layers' ranging from 0 to 20.

The top plot shows 'Tracking particles' on a logarithmic y-axis from 10^0 to 10^6 . The data points, represented by black circles with vertical error bars, show a decreasing trend from approximately 10^4 at layer 4 to about 5 at layer 16.

The bottom plot shows 'Ratio' on a logarithmic y-axis from 0.95 to 1.05. The data points, represented by black circles with vertical error bars, fluctuate around a horizontal line at 1.0, with a slight downward trend after layer 10.
