

N of reco track vs normalized χ^2

N of associated (recoToSim) tracks vs normalized χ^2

Figure 1 consists of two vertically stacked plots sharing a common x-axis labeled 'track χ^2 ' ranging from 0 to 20. The top plot shows 'fake tracks' on a logarithmic y-axis from 10^1 to 10^3 . It displays data points with error bars and a solid line fit that decreases as χ^2 increases. The bottom plot shows 'Ratio' on a linear y-axis from 1 to 1.4. It displays data points with error bars and a solid line fit that is relatively flat around a ratio of 1.0.

N of associated (recoToSim) looper tracks vs normalized χ^2

N of reco track vs. s
