

Fake rate vs normalized χ^2

Duplicates Rate vs normalized χ^2

Pileup rate vs normalized χ^2

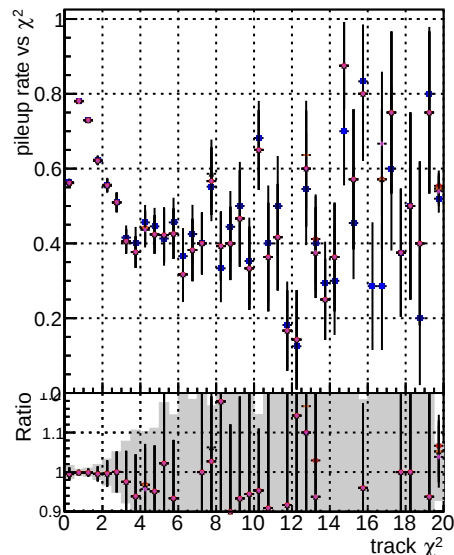

Figure 1: Fake rate vs. model. The chart shows the fake rate for different models. The y-axis is labeled 'Fake rate vs.' and the x-axis lists models: DOM, mkFit, XiMinus, BU, retrain, and a group of models including XiMinus, BU, retrain, and others. The fake rate is highest for DOM and lowest for the retrain model.
