

Number of tracks vs collection

Number of true tracks vs collection

Number	Model
1	DQM_mkFit_TT_retrainOldFiles125_v2_prelimWP_5iter

Figure 10 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.95 to 100 on a logarithmic scale. The x-axis lists the methods: generalTracks, installStep, lightPIT, lightPITQuadStep, onPIT, onPITQuadStep, detached, detachedQuadStep, mixed, mixedQuadStep, preProcess, preProcessQuadStep, core, coreRegionalStep, moonSeed, moonSeedStep, duplicateMerge, and moonSeedStepG. The plot shows that most methods have a ratio near 1.0, while 'generalTracks' has a significantly higher ratio of approximately 100. Error bars are shown for each method, indicating the variability in the ratio.

Number of pileup tracks vs collection
