Figure 1 is a log-log plot showing the ratio of duplicate tracks between different methods. The y-axis is labeled 'Ratio' and ranges from 0.9 to 10⁵. The x-axis is labeled 'Duplicate tracks' and ranges from 0.9 to 10⁵. The plot compares various methods: generalTracks, initialStep, initialStepQuasiStep, initialStepPTT, initialStepTripleStep, detachedStep, detachedStepQuasiStep, detachedStepTripleStep, mixedStep, mixedStepTripleStep, mixedStepLessStep, mixedStepMoreStep, and mixedStepRefinedStep. The plot shows that the ratio of duplicate tracks is generally high (above 10²) for most methods, except for the 'generalTracks' method which has a ratio near 1.0.

Number of pileup tracks vs collection
