

Number of tracks vs collection

Number of true tracks vs collection

Number	Model
1	DQM_mklFit_SoftQCD-updated-newPLDNN
2	DQM_mklFit_SoftQCD-updated-TTbarDNN
3	DQM_mklFit_SoftQCD-updated-TTbarDNN25

Figure 1 is a log-log plot showing the ratio of duplicate tracks to total tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 1 to 10,000. The x-axis lists 16 methods: GeneralTracks, AllStep, AllStepQuasiStep, AllStepTriStep, AllStepQuasiStep, AllStepTriStep, AllStepQuasiStep, AllStepTriStep, AllStepQuasiStep, AllStepTriStep, AllStepQuasiStep, AllStepTriStep, AllStepQuasiStep, AllStepTriStep, AllStepQuasiStep, AllStepTriStep. A horizontal line at Ratio = 1.5 indicates the expected ratio for independent tracks. Most methods show ratios significantly above 1.5, indicating high duplication. The 'GeneralTracks' method shows a ratio near 1.5, suggesting it is the least duplicated method shown.

Number of pileup tracks vs collection
