

Number of tracks vs collection

Number of true tracks vs collection

[illegible]

Number

The figure shows the relationship between the number of duplicate tracks and the ratio of duplicate tracks. The x-axis, labeled 'Duplicate tracks', is on a logarithmic scale ranging from 1 to 100. The y-axis, labeled 'Ratio', is also on a logarithmic scale ranging from approximately 0.5 to 1.0. Black dots represent individual data points, each with a vertical error bar indicating uncertainty. A light gray shaded rectangular region covers the area where the ratio is greater than or equal to 0.8 and the number of duplicate tracks is less than or equal to 10.

Number of pileup tracks vs collection
