

Efficiency vs hit

fake+duplicates vs hits

Figure 1 consists of two vertically stacked plots sharing a common x-axis labeled 'track layers' ranging from 0 to 25.

The top plot shows the 'fake-duplicates rate vs layers'. The y-axis ranges from 0 to 1.0. Data points are shown as black dots with vertical error bars. The rate starts at 1.0 for layer 0 and decreases sharply, reaching approximately 0.15 by layer 17, after which it remains relatively stable.

The bottom plot shows the 'Ratio' versus 'track layers'. The y-axis ranges from 1.0 to 1.2. Data points are shown as black dots with vertical error bars. The ratio is mostly around 1.0, with some fluctuations between 1.0 and 1.15.
