

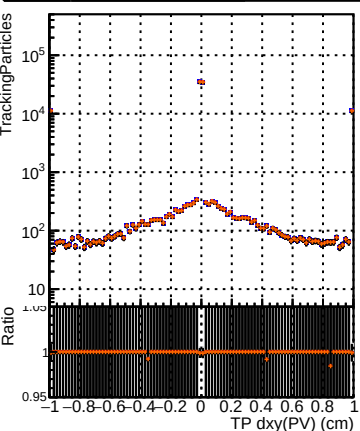

Figure 1 is a plot showing the ratio of reconstructed TPs to the true TPs as a function of the TP dxy (PV) (cm). The x-axis ranges from -25 to 25 cm, and the y-axis ranges from 0.95 to 1.05. The plot shows a sharp peak at 0 cm, where the ratio reaches approximately 1.05. The ratio is close to 1.0 for other values of dxy.
