

Figure 1 consists of two panels. The top panel is a histogram showing the distribution of duplicate tracks. The x-axis is labeled 'track min ΔR ' and ranges from 10^{-3} to 1. The y-axis is labeled 'duplicate tracks' and ranges from 0 to 100. The distribution is centered around 10^{-1} . The bottom panel is a plot of the ratio of duplicate tracks to total tracks. The x-axis is the same as the top panel. The y-axis is labeled 'Ratio' and ranges from 0.95 to 1.05. A horizontal line is drawn at a ratio of 1.0. A shaded gray region represents the 1σ uncertainty, which is centered around a ratio of 1.0. Two red dots are plotted on the ratio line at $\Delta R \approx 0.05$ and $\Delta R \approx 0.1$.
