

Figure 1: Efficiency vs. TP dxy. The plot shows efficiency (y-axis, 0.000 to 0.020) versus TP dxy (x-axis, -25 to 25 cm). A vertical line at x=0 separates the 'Ratio' region (y < 0.001) from the 'efficiency vs dxy' region (y > 0.001). Data points are shown as red circles with error bars. The efficiency is highest near x=0 and decreases as |x| increases.
