The figure consists of two vertically stacked panels sharing a common x-axis representing different methods. The top panel displays 'Duplicate tracks' on a logarithmic y-axis ranging from 0.95 to 10³. The bottom panel displays 'Ratio' on a linear y-axis ranging from 0.95 to 1.05. Each method has a red dot indicating the mean value, accompanied by vertical error bars representing the standard deviation. In the top panel, 'generalTracks' has the highest number of duplicate tracks (around 1000), while most other methods are clustered between 10 and 100. In the bottom panel, all methods have ratios very close to 1.0, with some showing slightly higher or lower values depending on the method.

Number of pileup tracks vs collection
