

Number of tracks vs collection

Number of true tracks vs collection

Number	Model
1	DQM_mkFit_softQCD
2	DQM_mkFit_softQCD-ncp
3	DQM_mkFit_softQCD-newTr3

The figure is a log-log scatter plot with error bars. The vertical axis is labeled "Duplicate tracks" and has major ticks at 10^1 , 10^2 , and 10^3 . The horizontal axis is labeled "Ratio" and has major ticks at 0.6, 0.8, 1.0, and 1.2. There are approximately 15 data series represented by black dots with vertical error bars. Some series have additional horizontal error bars. The series are distributed across the plot, with some having very low ratios (around 0.7) and others having higher ratios (up to 1.2). The background of the plot area is filled with a grid of small black dots.

Number of pileup tracks vs collection
