

Figure 10 is a plot showing the ratio of the efficiency of the TP to the efficiency of the TPC as a function of the TP dxy (cm). The x-axis ranges from -25 to 25 cm, and the y-axis ranges from 1 to 4. Data points are shown for three different TP sizes: 1 cm (red circles), 2 cm (blue squares), and 3 cm (black triangles). The ratio is approximately 1.0 for all TP sizes, indicating that the efficiency of the TP is very close to the efficiency of the TPC.
