Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various track types. The y-axis is labeled 'Ratio' and ranges from 0.8 to 100 (labeled as 10²). The x-axis lists the track types: GeneralTracks, InitialStep, NonHighTripleStep, HighTripleStep, RelaxedTripleStep, DetachedQuadStep, InterTripleStep, InterPairStep, InterTripleStep, InterQuadStep, CoreRegionStep, NonCoreRegionStep, and NonCoreRegionStepOut. The plot shows that most track types have a ratio near 1.0, while InitialStep and NonHighTripleStep have ratios around 6-7, and HighTripleStep has a ratio around 6. Error bars are shown for each data point.

Number of pileup tracks vs collection
