		DOMstep3	TT	default-relf5	

Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 1 to 10^5 on a logarithmic scale. The x-axis lists 18 methods: general, tracks, seeds, generalStep, tracksStep, seedsStep, generalSeed, tracksSeed, seedsSeed, generalStepIn, tracksStepIn, seedsStepIn, generalSeedIn, tracksSeedIn, seedsSeedIn, generalStepIn, tracksStepIn, and seedsSeedIn. A horizontal line at Ratio=1 indicates the baseline. The methods are grouped into three categories: general (red), tracks (blue), and seeds (green). The 'general' methods show the highest ratios, with 'general' and 'generalStep' being significantly above the baseline. The 'tracks' and 'seeds' methods show ratios closer to the baseline, with 'tracksStep' and 'seedsStep' being slightly above and 'tracksSeed' and 'seedsSeed' being slightly below.

Number of pileup tracks vs collection
