	▲ DQMstep3_TT_defaultNEWT203

Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.5 to 10^5 on a logarithmic scale. The x-axis lists 20 methods, grouped into three categories: 'General Tracks' (left), 'Triplets' (middle), and 'Duplicate Tracks' (right). A horizontal line at Ratio = 1 indicates the baseline. Each method is represented by a black dot with error bars. The 'General Tracks' methods show ratios mostly between 10 and 100. The 'Triplets' methods show ratios mostly between 1 and 10. The 'Duplicate Tracks' methods show ratios mostly between 1 and 10, with some outliers at higher ratios.

Number of pileup tracks vs collection
