Figure 1 is a log-linear plot showing the ratio of duplicate tracks to total tracks for various track types. The y-axis is labeled 'Ratio' and ranges from 0.8 to 10^2 on a logarithmic scale. The x-axis lists various track types. A horizontal line is drawn at a ratio of 1.0. The 'Duplicate tracks' category shows a significantly higher ratio, around 60. The 'General track' category shows a ratio slightly below 1.0. Most other track types have ratios very close to 1.0.

Track Type	Ratio (approx.)
Duplicate tracks	60
General track	0.85
Initial track	1.0
Final track	1.0
Intermediate track	1.0
Transition track	1.0
Cluster track	1.0
...	...

Number of pileup tracks vs collection
