

N of reco track vs dxy

N of associated (recoToSim) tracks vs dxy

The figure consists of two vertically stacked plots. The top plot shows a histogram of 'fake tracks' (y-axis, logarithmic scale from 1 to 10^6) versus 'track dxy (cm)' (x-axis, linear scale from -20 to 20). The histogram is orange, and a red dashed line represents a fit to the data. The bottom plot shows a scatter plot of 'fake tracks' (y-axis, linear scale from 0.95 to 1) versus 'track dxy (cm)' (x-axis, linear scale from -20 to 20). The scatter plot is orange, and a red dashed line represents a fit to the data.
