

N of simulated tracks vs hit

N of associated tracks (simToReco) vs hit

N of sim $\longrightarrow$ DQM_MkFitREFit_1000ev

Figure 1 consists of two vertically stacked plots sharing a common x-axis labeled 'TP layers' ranging from 0 to 25. The top plot shows 'Reconstructed TPs' on a logarithmic y-axis from 10 to 100. It features data points with error bars (black and red) and a shaded region representing uncertainty. The bottom plot shows the 'Ratio' on a linear y-axis from 0.95 to 1.05, with a horizontal line at 1.0. It also shows data points with error bars and a shaded region. The shaded region in both plots is centered around 10 TP layers.

N of simulated tracks vs pixel layer

N of associated tracks (simToReco) vs pixel layer

N of simulated tracks vs 3D layer

N of associated tracks (simToReco) vs 3D layer
