

N of reco track vs dxy

N of associated (recoToSim) tracks vs dxy

Figure 1 consists of two panels. The top panel is a log-linear plot of 'fake tracks' (y-axis, logarithmic scale from 1 to 1000) versus 'track dxy (cm)' (x-axis, linear scale from -20 to 20). It shows a distribution of fake tracks with a prominent peak around 0 cm. The bottom panel is a linear plot of 'F' (y-axis, linear scale from 0.95 to 1.0) versus 'track dxy (cm)' (x-axis, linear scale from -20 to 20). It shows a distribution of 'F' values, with a sharp drop to 0.95 around 0 cm.
