

Number of tracks vs collection

Number of true tracks vs collection

Number 

Figure 10 is a log-linear plot showing the ratio of duplicate tracks between different methods. The y-axis is labeled 'Ratio' and ranges from 0.9 to 10,000 on a logarithmic scale. The x-axis lists various methods: general, general+fact, high, high+fact, PTT, PTT+fact, reached, reached+fact, mixed, mixed+fact, total, total+fact, LST, LST+fact, CCS, CCS+fact, intersection, intersection+fact, displaced, displaced+fact, and kate+fact. The plot shows that the ratio is generally close to 1.0, with some outliers for 'duplicate tracks' at high ratios.

Number of pileup tracks vs collection
