

Efficiency vs vertpos

fake+duplicates vs vert r

Figure 1 consists of two panels. The top panel is a plot of 'fake+duplicates vs. z' on the y-axis (ranging from 0.2 to 1.0) against 'track ref. point z (cm)' on the x-axis (ranging from -30 to 30). The data points are colored (black, red, green, blue, magenta) and have vertical error bars. A dashed horizontal line is at y=0.8. The bottom panel is a plot of 'Ratio' on the y-axis (ranging from 0.95 to 1.05) against 'track ref. point z (cm)' on the x-axis (ranging from -30 to 30). The data points are colored and have vertical error bars. A solid horizontal line is at y=1.0.
