

Efficiency vs vertpos

fake+duplicates vs vert r

[illegible]

Figure 1 consists of two panels. The top panel is a scatter plot with error bars showing 'fake+duplicates vs. z' on the y-axis (ranging from 0.0 to 0.8) against 'track ref. point z (cm)' on the x-axis (ranging from -30 to 30). The data points are colored green and magenta, showing a U-shaped trend that reaches a minimum around z = 0. The bottom panel is a scatter plot with error bars showing 'Ratio' on the y-axis (ranging from 0.95 to 1.10) against 'track ref. point z (cm)' on the x-axis (ranging from -30 to 30). The data points are colored green, magenta, and orange, clustered around a horizontal red line at Ratio = 1.0.
