

Efficiency vs vertpos

fake+duplicates vs vert r

Figure 1 consists of two panels. The top panel shows the ratio of fake+duplicates vs. z for the 2015 data. The x-axis is track ref. point z (cm) from -30 to 30. The y-axis is Ratio from 0.95 to 1.0. Data points are green circles with error bars. A vertical line is at z = -15 cm. The bottom panel shows the ratio for the sample with z < -15 cm. The x-axis is track ref. point z (cm) from -30 to -15. The y-axis is Ratio from 0.95 to 1.0. Data points are green circles with error bars. A vertical line is at z = -15 cm.
