--------	-----	-----------	------------	--------	-------	----------	------

The figure consists of two vertically stacked panels sharing a common x-axis representing different methods. The top panel's y-axis is labeled "Duplicate tracks" and uses a logarithmic scale ranging from 10^0 to 10^5 . It displays data points with error bars for each method, indicating the number of duplicate tracks. The bottom panel's y-axis is labeled "Ratio" and uses a linear scale from 0.6 to 1.2. It shows the ratio of duplicate tracks to total tracks for each method, represented by red dots with vertical error bars. A horizontal grey shaded band is present between the two panels, spanning the width of the plot.

Number of pileup tracks vs collection
