

Number of tracks vs collection

Number of true tracks vs collection

Number DQM_V0001_R000000001_Global_CMSSW_mknocut3_RECO

Number

Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.6 to 10⁵ on a logarithmic scale. The x-axis lists 16 methods: generalTracks, missStep, missStep, missStep, missStep, missStep, missStep, missStep, missStep, missStep, missStep, missStep, missStep, missStep, missStep, missStep, and DuplicateTracks. A horizontal line at Ratio = 1.0 indicates the baseline. The 'DuplicateTracks' method shows a significantly higher ratio, around 10^{4.5}. Other methods are clustered around the baseline, with some showing slightly higher or lower ratios.

Number of pileup tracks vs collection
