

Figure 1 consists of two panels. The top panel is a scatter plot with error bars showing the 'fake+duplicate rate vs. dxy'. The y-axis ranges from 0.05 to 0.5, and the x-axis ranges from -25 to 25 cm. Data points are shown for three different track selection criteria: red circles, blue squares, and black dots. The bottom panel shows the 'Ratio' (y-axis, 1.0 to 1.4) versus 'track dxy (cm)' (x-axis, -25 to 25). The ratio is shown for the same three criteria. A shaded gray region indicates the uncertainty band.
