

Figure 1 consists of two vertically stacked plots sharing a common x-axis labeled 'track dx_y (cm)' ranging from -25 to 25. The top plot's y-axis is labeled 'fake-glyphic rate vs. dx_y' and ranges from 0 to 0.1. It shows data points for 2011 (red circles), 2012 (black circles), and 2013 (blue squares) clustered around dx_y = 0. A vertical line is drawn at dx_y = 0. The bottom plot's y-axis is labeled 'Ratio' and ranges from 0 to 4. It shows the same data points for 2011, 2012, and 2013, also clustered around dx_y = 0. A vertical line is drawn at dx_y = 0, and a shaded region is visible around dx_y = 0.
