

N of simulated tracks vs pT

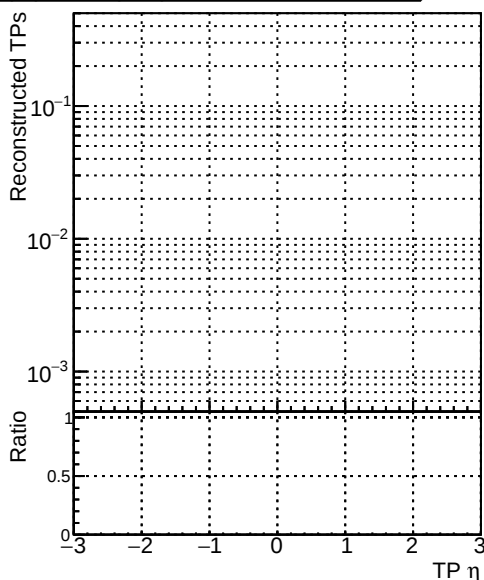

N of associated tracks (simToReco) vs pT

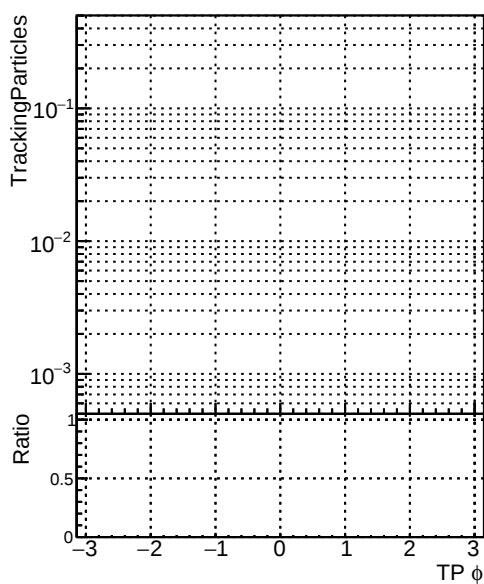

Figure 1: Schematic representation of the experimental design. The figure shows a timeline of a 10-minute session. It starts with a 1-minute rest period, followed by a 1-minute rest period, and then a 1-minute rest period. The main part of the session is divided into two blocks of 5 minutes each. The first block contains 10 trials, and the second block contains 10 trials. Each trial consists of a 1-minute rest period, followed by a 1-minute rest period, and then a 1-minute rest period. The trials are labeled with 'N of sin' and 'N of cos'.
