

N of simulated tracks vs pT

N of associated tracks (simToReco) vs pT

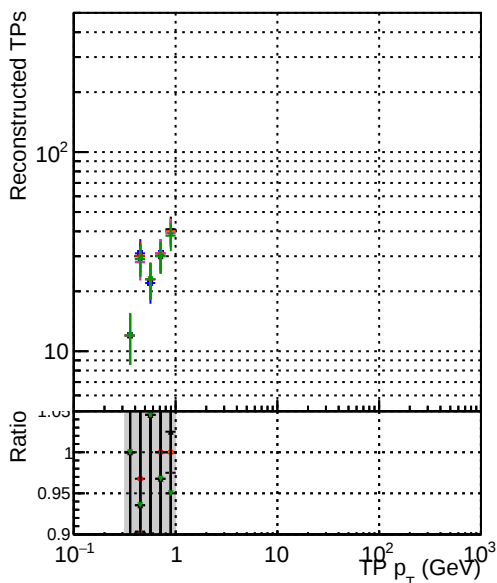

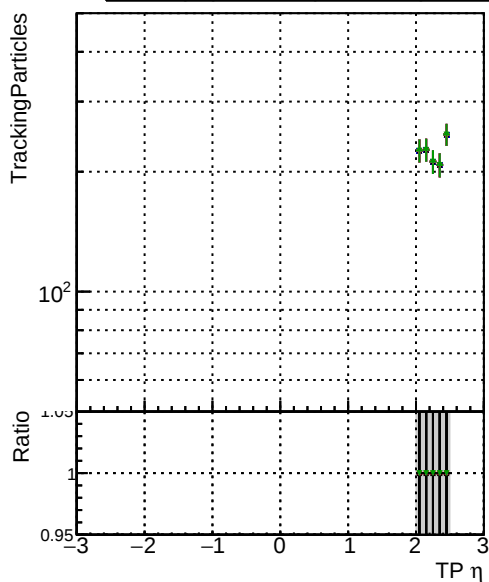

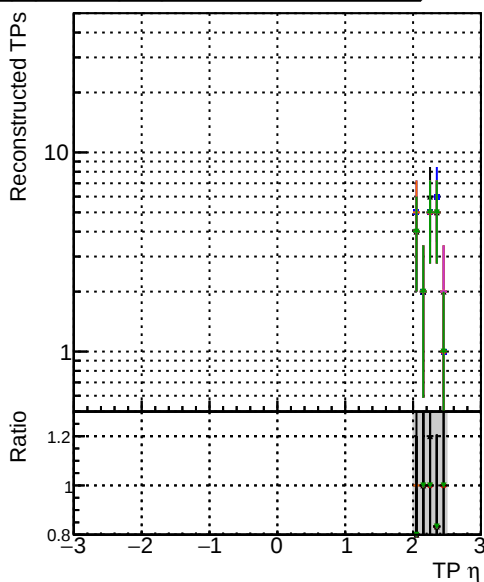

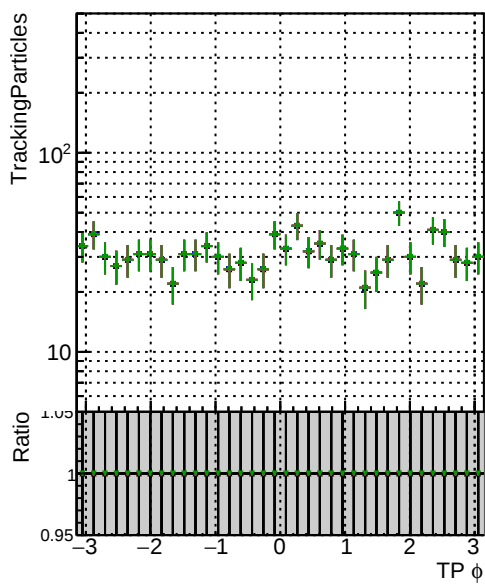

Figure 1: Schematic representation of the experimental design. The figure shows a grid of 10 rows and 10 columns. The columns are labeled 'original', 'step2', 'p0t0t1', 't0t1', 'eta2', 'p0t0t2', 't0t2', 'p0t0t2', 't0t2', and 'eta2'. The rows are labeled 'p0t0t1', 't0t1', 'eta2', 'p0t0t2', 't0t2', 'p0t0t2', 't0t2', 'eta2', 'p0t0t2', and 't0t2'. A legend on the left indicates 'N of sim' with values 1, 2, 3, 4, 5, 6, 7, 8, 9, 10. A color bar on the right indicates 'step' with values 1, 2, 3, 4, 5, 6, 7, 8, 9, 10.
