

N of simulated tracks vs pT

N of associated tracks (simToReco) vs pT

[illegible]

Figure 1 is a log-linear plot showing the ratio of reconstructed TPs to the true TPs versus the TP index η . The y-axis is labeled 'Ratio' and ranges from 0.95 to 10^2 on a logarithmic scale. The x-axis is labeled 'TP η ' and ranges from -3 to 3. A horizontal line is drawn at Ratio = 1. Data points with error bars are plotted for $\eta = 1, 2, 3$. For $\eta = 1$, the ratio is approximately 1.0. For $\eta = 2$, the ratio is approximately 1.5. For $\eta = 3$, the ratio is approximately 50.
