

The diagram illustrates the flow of data from BOM through four stages: original, step2, and step3, across four different template types. The stages are represented by horizontal bars at the top, and the template types are represented by vertical bars on the left. The legend indicates the following colors:

- BOM:** Blue
- original:** Black
- step2:** Red
- step3:** Green

The diagram shows that the BOM stage is present in all template types. The original stage is present in all template types except Template 1. The step2 stage is present in all template types except Template 1. The step3 stage is present in all template types except Template 1.
