

N of simulated tracks vs pT

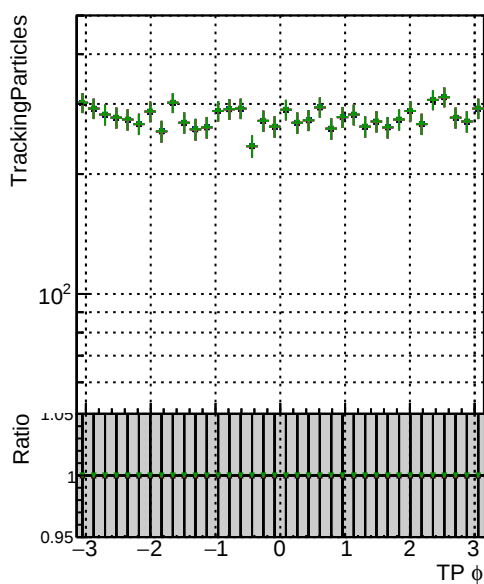

N of associated tracks (simToReco) vs pT

[illegible]

The figure consists of two vertically stacked panels sharing a common x-axis labeled 'TP η ' ranging from -3 to 3. The top panel's y-axis is 'Reconstructed TPs' on a logarithmic scale from 10^3 to 10^4 . It displays green dots representing data points, which are clustered around $\eta \approx 1.8$ and $\eta \approx 2.0$. The bottom panel's y-axis is 'Ratio' on a linear scale from 0.95 to 1.05. It shows a black histogram of the ratio values, which is centered around 1.0 for η between 1.5 and 2.5. A solid green horizontal line is drawn at Ratio = 1.0.
