

The figure consists of two vertically stacked panels sharing a common x-axis labeled 'TP ϕ ' ranging from -3 to 3. The top panel is a scatter plot with error bars showing 'Reconstructed TPs' on a logarithmic y-axis (1 to 100). It compares the proposed method (green) with other methods (blue, red, orange, purple). The bottom panel is a bar chart showing the 'Ratio' of the proposed method's performance to other methods on a linear y-axis (0.8 to 1.4).
