

Efficiency vs hit

Plot of efficiency vs hit. The y-axis is 'efficiency vs hits' (0.0 to 0.8) and the x-axis is 'TP hits' (0 to 60). Data points with error bars are shown for four series: DQM_original_step2_ttbar-phase1-newgeom (blue), DQM_pixelCPETemplate_step2_ttbar-phase1-newgeom (red), DQM_pixelCPETemplateCutChiSquare5_step2_ttbar-phase1-newgeom (black), and DQM_pixelCPETemplateCutChiSquare5_step2_ttbar-phase1-newgeom_test (orange). A histogram is shown in the bottom panel.

fake+duplicates vs hits

Plot of fake+duplicates rate vs hits. The y-axis is 'fake+duplicates rate vs hits' (0.0 to 0.5) and the x-axis is 'track hits' (0 to 40). Data points with error bars are shown for the same four series as the efficiency plot. A histogram is shown in the bottom panel.

Efficiency vs TP layers

Plot of efficiency vs TP layers. The y-axis is 'efficiency vs layers' (0.0 to 0.02) and the x-axis is 'TP layers' (0 to 25). Data points with error bars are shown for the same four series. A histogram is shown in the bottom panel.

fake+duplicates vs TP layers

Plot of fake+duplicates rate vs TP layers. The y-axis is 'fake+duplicates rate vs layers' (0.0 to 0.5) and the x-axis is 'track layers' (0 to 25). Data points with error bars are shown for the same four series. A histogram is shown in the bottom panel.

Efficiency vs pixel layer

Plot of efficiency vs pixel layer. The y-axis is 'efficiency vs pixel layers' (0.0 to 0.01) and the x-axis is 'TP pixel layers' (0 to 8). Data points with error bars are shown for the same four series. A histogram is shown in the bottom panel.

fake+duplicates vs pixel layers

Plot of fake+duplicates rate vs pixel layers. The y-axis is 'fake+duplicates rate vs pixel layers' (0.0 to 0.8) and the x-axis is 'track pixel layers' (0 to 8). Data points with error bars are shown for the same four series. A histogram is shown in the bottom panel.

Efficiency vs 3D layer

Plot of efficiency vs 3D layer. The y-axis is 'efficiency vs 3D layers' (0.0 to 0.8) and the x-axis is 'TP 3D layers' (0 to 20). Data points with error bars are shown for the same four series. A histogram is shown in the bottom panel.

fake+duplicates vs 3D layers

Plot of fake+duplicates rate vs 3D layers. The y-axis is 'fake+duplicates rate vs 3D layers' (0.0 to 0.5) and the x-axis is 'track 3D layers' (0 to 20). Data points with error bars are shown for the same four series. A histogram is shown in the bottom panel.
