

Efficiency vs pixel layer

Plot of efficiency vs pixel layer. The y-axis is labeled 'efficiency vs pixel layers' and 'Ratio', ranging from 0.7 to 0.1. The x-axis is labeled 'TP pixel layers', ranging from 0 to 8. Data points are shown for the same four series. A horizontal line is at Ratio = 1.0. A shaded gray region is visible for TP pixel layers between 0 and 5.

fake+duplicates vs pixel layers

Plot of fake+duplicates rate vs pixel layers. The y-axis is labeled 'fake+duplicates rate vs pixel layers' and 'Ratio', ranging from 0.9 to 0.8. The x-axis is labeled 'track pixel layers', ranging from 0 to 8. Data points are shown for the same four series. A horizontal line is at Ratio = 1.0. A shaded gray region is visible for track pixel layers between 0 and 5.

Efficiency vs 3D layer

Plot of efficiency vs 3D layer. The y-axis is labeled 'efficiency vs 3D layers' and 'Ratio', ranging from 0.7 to 0.05. The x-axis is labeled 'TP 3D layers', ranging from 0 to 20. Data points are shown for the same four series. A horizontal line is at Ratio = 1.0. A shaded gray region is visible for TP 3D layers between 0 and 12.

fake+duplicates vs 3D layers

Plot of fake+duplicates rate vs 3D layers. The y-axis is labeled 'fake+duplicates rate vs 3D layers' and 'Ratio', ranging from 0.95 to 1.0. The x-axis is labeled 'track 3D layers', ranging from 0 to 20. Data points are shown for the same four series. A horizontal line is at Ratio = 1.0. A shaded gray region is visible for track 3D layers between 0 and 12.
