Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.7 to 100 (labeled as 10^2). The x-axis lists 20 methods: DuplicateTracks, InitialStep, GeneralTracks, InitialStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, HighStep, and HighStep. A horizontal line at Ratio = 1 indicates the baseline. The 'DuplicateTracks' method shows a significantly higher ratio, around 50, while 'InitialStep' shows a ratio around 40. All other methods have ratios very close to 1.

Number of pileup tracks vs collection
